

RETAIL SALES FELL 1.6 PER CENT

Retail sales in June 2014 decreased 1.6 per cent below the \$90.1 million recorded in June 2013. All retail sectors experienced declines in sales revenue with the exception of motor vehicle retailers and liquor stores. Building material stores registered the largest decrease in sales of 10.5 per cent while motor vehicle retailers recorded the strongest increase of 32.0 per cent.

Residents returning to the Island declared overseas purchases valued at \$4.3 million during June 2014. This contributed to a combined local and overseas spending total of \$93.0 million.

After adjusting for the annual retail sales rate of inflation, measured at 1.6 per cent in June, the volume of retail sales decreased by 3.1 per cent.

There were 24 shopping days during the month, the same as in June 2013.

The RSI is currently based on a matched sample of reporting retail stores. The sales data are collected from these stores through a monthly mail survey. The Department of Statistics wishes to acknowledge the continuous support of the business community in supplying the required sales data.

SUMMARY STATISTICS

Period	Total Retail Sales Index*	Annual % Change in Retail Sales		Total Retail Sales Estimate (\$M)	Overseas Purchases Declared by Returning Residents		Combined Retail Sales (Local + Overseas)	
		Value	Volume		Value (\$M)	% Change	Value (\$M)	% Change

Jun	99.1	-1.6	-3.1	88.7	4.3	-4.4	93.0	-1.7

Building Material Stores

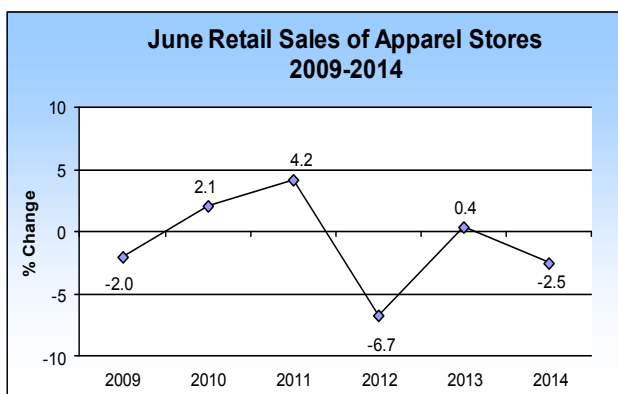

Retailers of building materials registered a decline in sales receipts of 10.5 per cent during June 2014. Lower sales receipts reflected the decreased demand for building supplies for home improvements and major commercial construction projects.

All Other Store Types

Sales receipts for the all other store types sector slipped 4.2 per cent. Sales for boat and marine retailers fell 12.5 per cent. Sales of furniture, appliances and electronics decreased 9.0 per cent while sales for pharmaceutical stores contracted 1.3 per cent. In contrast, gross receipts for tourist-related stores were 5.8 per cent higher than 2013.

Apparel Stores

Sales revenue for apparel stores were 2.5 per cent lower year-over-year. The drop in sales was attributed partly to a 1.9 per cent increase in the price of clothing and footwear.

Service Stations

Sales receipts for service stations decreased 1.8 per cent year-over-year. This decline was mostly

due to consumers purchasing a lower volume of gasoline during the month, as the price of fuel increased 1.1 per cent during the period.

Food and Liquor Stores

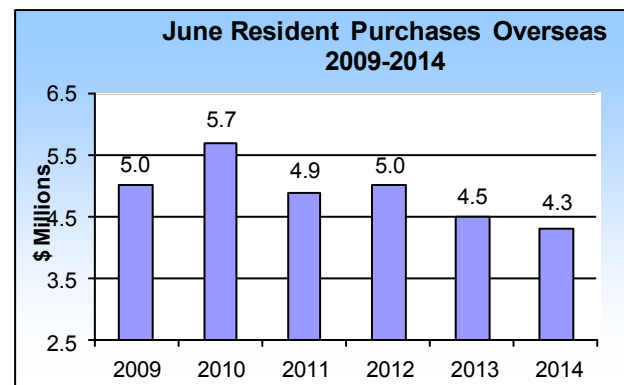

Receipts from food sales decreased 2.5 per cent compared to last year. Retailers attributed the decline to one less weekend shopping day occurring in June 2014. In contrast, sales revenue for liquor stores was 1.8 per cent higher during the month. The increase in sales was attributed partly to the rise in liquor prices of 1.6 per cent.

Motor Vehicle Stores

Retailers of motor vehicle stores registered a 32.0 per cent rise in sales compared to June 2013. The positive sales growth was due primarily to an increase in the volume of cars and motorcycles sold.

Resident Purchases Overseas

Residents declared \$4.3 million in overseas purchases in June 2014. This represented a 4.4 per cent decline when compared to the previous year.

(1) Index numbers are subject to revisions

*The yearly series reflect annual changes

(2) Includes household supplies but excludes alcoholic beverages

* Revisions are also reflected in the Summary Statistics on Page 1

(3) Does not include sales to bars, clubs, hotels and restaurants

EXPLANATORY NOTES

The **Retail Sales Index (RSI)** was first developed in 1982. It is a key economic indicator used to assess the current performance of sales activity in the retail sector of the economy.

The RSI is a self-weighting index. This means that stores reporting a large value of sales have a greater impact on the movement of the index than stores reporting a low level of sales activity.

The RSI serves to:

- 1) measure monthly and annual movements of retail sales
- 2) provide an estimated gross turnover of sales in the local retail sector
- 3) act as a barometer of change in the level of demand for both the domestic and tourist markets

The index is structured into seven broad sectors:

- Food Stores
- Liquor Stores
- Motor Vehicle Dealers
- Service Stations
- Building Materials
- Apparel Stores
- All Other Store Types

Total retail stores across the seven sectors represent roughly 70% of all retail activity on the Island. The base period 2006 recorded a gross turnover in retail sales of \$1.1 billion.

Retail outlets that participate in the retail sales survey and trade in similar types of goods are grouped into these seven sectors. It is important to note that sector classifications are not interchangeable with commodity classifications. This is because most retail outlets sell several kinds of commodities. The sector classification generally reflects the individual commodity or the commodity group, which is the primary source of the establishment's receipts, or some mixture of commodities, which characterizes the establishment's business.

CONCEPTS AND DEFINITIONS

Retail Trade

Retail trade is the sector of the economy that includes establishments that are engaged in the sale of mer-

chandise for personal or household consumption and in the rendering of services that are incidental to the sale of the merchandise.

Retail Establishment

A retail establishment is one that operates at a fixed place of business and is engaged in sales activities to attract the general public to buy merchandise.

Value Sales

The dollar value of a quantity of goods and services sold for cash or credit. Sales include the amounts received from customers for: immediate and layaway purchases; rentals; installations; maintenance; repairs and alterations.

Gross Sales

Gross sales are sales for which no deductions have been made for the return of merchandise, allowances and discounts.

Volume Sales

The dollar value of a quantity of goods and services sold at current retail market prices adjusted to eliminate the effect of price change.

Estimated Gross Turnover

Estimated gross turnover is the total value of retail sales generated in the retail sector. It is calculated by applying the all-items index number for the current month to the average monthly sales figure determined in the base year.

Base Period

This is the time period used as a reference point for measuring the shift in the value of retail sales. The base period for the Bermuda RSI is 2006.
