

RETAIL SALES DIP BY NEARLY ONE PER CENT

Consumers spent an estimated \$89.4 million on retail sales in March 2010. This level of spending fell by nearly 1 per cent or \$1 million below the \$90.1 million in retail sales recorded in March 2009. Retail sales increased for all sectors with the exception of building material stores and all other store types.

Residents returning to the Island from business and vacation trips declared overseas purchases of

goods valued at \$4.6 million during the month. This was slightly higher than the \$4.4 million declared in March 2009. Combined local and overseas spending totalled \$94.0 million during the month.

After adjusting for the annual retail sales rate of inflation, measured at 2.3 per cent in March, the volume of retail sales contracted 3.0 per cent.

There were 27 shopping days during the month, the same as in March 2009.

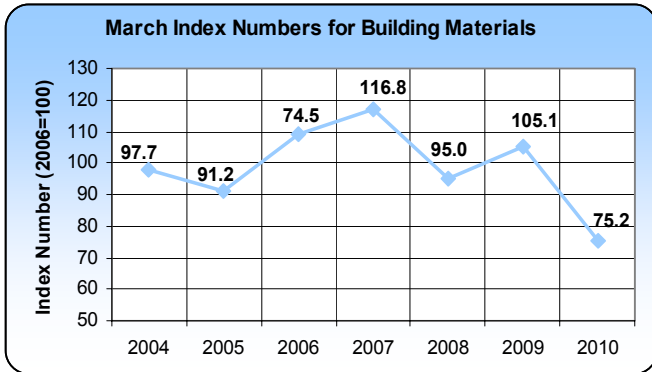

The RSI is currently based on a matched sample of reporting retail stores. The sales data are collected from these stores through a monthly mail survey. The Department of Statistics wishes to acknowledge the continuous support of the business community in supplying the required sales data.

Building Materials

Weak sales continued to plague retailers of building materials and supplies stores in March 2010. Sales plummeted 28.5 per cent during the month as a result of a drop in building activity contracts across the construction industry. Sales have been steadily declining since August 2009.

All Other Store Types

The all other store types sector reported a drop in sales revenue of 4 per cent. Retailers of furniture outlets and tourist related stores reported the largest declines in this sector decreasing 39 per cent and 36 per cent, respectively. In contrast, retailers of marine supply stores and pharmaceutical stores reported sales increases year-over-year.

Apparel Stores

Apparel store retailers reported a 3.6 per cent gain in sales in March 2010. An increase in consumer demand boosted apparel sales to its largest increase since April 2008. The growth in apparel sales in March marked only the second sales increase in the past year.

Service Stations

Sales at service stations grew by 14 per cent over March 2009. The increase in sales

revenue was due partly to a 10 per cent rise in the price of fuel.

Motor Vehicle Stores

Motor vehicle sales remained relatively static during March 2010 when compared to previous year's levels.

Food and Liquor stores

Gross receipts for food stores increased nearly 6 per cent in March 2010, when compared to the same month in 2009. A 2 per cent rise in the price of food contributed to higher sales receipts. Liquor store sales also rose by 5 per cent compared to March 2009.

Resident Purchases Overseas

Resident purchases overseas were marginally higher in March 2010 compared to the year prior.

(2) Includes household supplies but excludes alcoholic beverages

(3) Does not include sales to bars, clubs, hotels and restaurants

* The yearly series reflect annual changes

EXPLANATORY NOTES

The **Retail Sales Index (RSI)** was first developed in 1982. It is a key economic indicator used to assess the current performance of sales activity in the retail sector of the economy.

The RSI is a self-weighting index. This means that stores reporting a large value of sales have a greater impact on the movement of the index than stores reporting a low level of sales activity.

The **RSI** serves to:

- 1) measure monthly and annual movements of retail sales
- 2) provide an estimated gross turnover of sales in the local retail sector
- 3) act as a barometer of change in the level of demand for both the domestic and tourist markets

The index is structured into seven broad sectors:

- Food Stores
- Liquor Stores
- Motor Vehicle Dealers
- Service Stations
- Building Materials
- Apparel Stores
- All Other Store Types

Total retail stores across the seven sectors represent roughly 70% of all retail activity on the Island. The base period 2006 recorded a gross turnover in retail sales of \$1.1 billion.

Retail outlets that participate in the retail sales survey and trade in similar types of goods are grouped into these seven sectors. It is important to note that sector classifications are not interchangeable with commodity classifications. This is because most retail outlets sell several kinds of commodities. The sector classification generally reflects the individual commodity or the commodity group, which is the primary source of the establishment's receipts, or some mixture of commodities, which characterizes the establishment's business.

CONCEPTS AND DEFINITIONS

Retail Trade

Retail trade is the sector of the economy that includes establishments that are engaged in the sale of merchandise for personal or household consumption and in the rendering of services that are incidental to the sale of the merchandise.

Retail Establishment

A retail establishment is one that operates at a fixed place of business and is engaged in sales activities to attract the general public to buy merchandise.

Value Sales

The dollar value of a quantity of goods and services sold for cash or credit. Sales include the amounts received from customers for: immediate and layaway purchases; rentals; installations; maintenance; repairs and alterations.

Gross Sales

Gross sales are sales for which no deductions have been made for the return of merchandise, allowances and discounts.

Volume Sales

The dollar value of a quantity of goods and services sold at current retail market prices adjusted to eliminate the effect of price change.

Estimated Gross Turnover

Estimated gross turnover is the total value of retail sales generated in the retail sector. It is calculated by applying the all-items index number for the current month to the average monthly sales figure determined in the base year.

Base Period

This is the time period used as a reference point for measuring the shift in the value of retail sales. The base period for the Bermuda RSI is 2006.

Overseas Purchases

Overseas purchases reflect the value of goods declared by residents through HM Customs while travelling on vacation or business trips.
